The covid bugiste: history of pandemic rural

Le territoire

Cartographie du territoire

Covid in Bugey: organisation by the CPTS (territorial professional health community)

- A real territory with geographical limits: a membership
- A general hospital in the center, 3 MSP (multidisciplinary health center)
- A territorial guard medical center
- ACI (interprofessional agreement sign 07/02/2020, pre epidemic
- Evolution in 4 phases
 - Suspected cases
 - Information for populations and professionals
 - Screening
 - Vaccination

Benefits of organisation in CPTS

- Federate and interest the professionals of the territory
- Recognize the CPTS like a partner
- Forging strong bonds with local authorities, socio-professional world, education
- Facilitation of the exercise of each
- Respond to public health actions
- Adaptability of the liberal world
- Involvement of all: liberals, salaried, retired, volunteers

Some numbers

- • 3 centers of screening have been deployed
 - Drive in partnership with city laboratory from 11/05 to 19/07/2020
 - 731 screenings
 - • center of screening in connection with the CH Bugey Sud from 2/10 to 26/11/2020:
 - 1192 screenings
 - center attached to the vaccination center from 13/01 to 04/02/2022:
 - 1338 tests carried out
- • Vaccination center open from 13/01/2021 to 19/03/2022:
 - More than 110 000 injections
 - 140 nurses
 - 49 doctors
 - 9 pharmacists
 - 3 dentists
 - 3 veterinarians
 - 29 volunteers

Outlook

- Trust the actors on the ground
- Give voice to proximity
- Agility, speed of primary care called first resort: impressive strike force
- Make even more connections with municipalities, communities of municipalities, local institutions, hospital.....
- Have a territorial reflection and expertise about health
